

A CARIBBEAN ACADEMIC PLATFORM, BUILT WHERE THE STUDENTS ARE

## What Bridge Point Scholars is, and how SALCC educators can engage.

Bridge Point Scholars is a Caribbean educational resource hub headquartered in Castries. The platform is live for paying students across the region. This one-pager exists so SALCC faculty can read what we have built, see where CAPE delivery is going in August 2026, and decide how to engage with us as the build progresses.

### BRIDGE POINT AT A GLANCE

**35,607**

Questions in the bank with worked answers and explanations

**30**

Subjects across CSEC, primary, and CAPE Phase 1

**554**

Instructional videos with Caribbean context

**36**

CAPE syllabi RAG-indexed for the AI tutor

### WHAT IS ON THE PLATFORM TODAY

#### For the student

- **Intake diagnostic** that builds a personal study plan before they touch a tutor.
- **Quick Study** with Bayesian mastery, forgetting decay, and next-best-question selection.
- **AI Tutor** grounded in our content database, Caribbean-context by default, scaffolds rather than solves.
- **Writing Corner** with five-dimension essay feedback that never rewrites the student's work.
- **SBA Helper** Socratic coach that coaches but never generates SBA content. Auto-builds the CXC AI Disclosure Form.
- **Accessibility** with OpenDyslexic, Reader View, math-to-speech, high contrast, low-bandwidth mode.

#### How the AI behaves

- **Grounded.** AI answers come from our curated question bank, study guides, and CAPE syllabi. Not the open web.
- **Bounded.** Hard prompt limits prevent the AI from doing the student's work. Every interaction is audit-logged.
- **Caribbean by default.** Names, settings, currency, and exam register match the region. Not configurable away.
- **Mastery-aware.** The tutor knows what each student has mastered. It scaffolds where the gap is, not where they are already strong.
- **Aligned with CXC.** Architecture matches the CXC Generative AI Policy Framework (2025) and UNESCO 2023 guidance.

### CAPE ROLLOUT, AUGUST 2026

Phase 1 is in production: 36 subjects in the platform, every CAPE syllabus indexed for the AI tutor, three subscription tiers available with CAPE access, and CAPE tutoring sessions at EC\$38 per session. Phase 2 (per-subject topic tree, module-level study guides, specimen papers, item generation) builds through summer. We are in active communication with CXC about content licensing and seeking lecturer feedback before rolling out CAPE practice content. The rails are ready. The content waits on the right partners and the right feedback.

#### EXPLORER CAPE

**EC\$14.99 / mo**

+EC\$5 above Explorer base

#### LEARNER CAPE

**EC\$34.99 / mo**

+EC\$5 above Learner base

#### SCHOLAR CAPE

**EC\$54.99 / mo**

+EC\$5 above Scholar base

#### CAPE TUTORING

**EC\$38 / session**

Online or in-person

### HOW SALCC EDUCATORS CAN ENGAGE

#### Shape what we build for CAPE

- Tell us which CAPE Year 1 subjects should deepen first; we will sequence the build accordingly.
- Help calibrate AI grading on real CAPE mark schemes. Two hours per subject shapes thousands of student attempts.
- Review our first batch of AI-generated practice items and flag what is off.
- Surface specimen-paper context that the CXC specimens leave thin.

#### Share, refer, stay in touch

- Share this brief and the slide deck with other departments and faculty at SALCC.
- Mention Bridge Point to students who could benefit from the platform today.
- Refer educator colleagues across the region who want to follow what we are building.
- Subscribe for occasional product updates; reach out to Chani directly for any follow-up.

#### Next step

A short working session in June for SALCC educators interested in shaping CAPE content. No commercial decision attached. We bring the items, you bring the classroom judgment.
